

Product Data Sheet

Commercial Bleach – Sanitizer and De-stainer

Commercial strength bleach used for soaking and general sanitizing.

Product Description

Commercial Bleach sanitizes and de-stains.

Commercial bleach is great for general sanitizing

Characteristics

- Non Flammable
- pH 13
- Clear colourless to pale green to yellow liquid
- Odour: slight chlorine

Tools / Safety Equipment

- * Rubber or PVC gloves
- * Splash-proof goggles
- * Sponge or brush
- * Where an inhalation risk exists, wear a Full-face Type B (Inorganic and Acid gas) respirator.
- * Coveralls
- * Bucket
- * Mop

Safety

Commercial Bleach may give off dangerous gas if mixed with other products. Avoid contact with eyes and skin. Ensure adequate ventilation when using. Contact with Acids

liberates toxic gas. Wear suitable protective clothing and face protection.

Application Procedure

1. Read MSDS prior to use.
2. Read the safety instructions on label before use.
3. Commercial Bleach should be used with properly installed and serviced dispensing equipment.

First Aid

- If poisoning occurs, contact a doctor or Poisons Information Centre (Ph: 131 126)
- If swallowed, do NOT induce vomiting. Give a glass of water
- If skin contact occurs, remove contaminated clothing and wash skin thoroughly.
- If in eyes, hold eyes open, flood with water continuously for at least 15mins and see a doctor.

Pack Sizes

3 x 5Lt, 25Lt
